### PROJECTS

#### 1) GOTRAVEL WEBSITE.

**Role:** Software Developer | **Technologies:** ReactJs, JavaScript, HTML5, CSS3, Firebase, Auth0, Stripe & Mapbox.

**Description:** Introducing our comprehensive travel planner website where you can discover new horizons on our Explore Places page, find inspiration on the Most Popular Destinations section, and tailor your adventure with our curated Packages. Secure your stay with ease through our Hotel Booking page and reach out effortlessly via the Contact Us form. With data seamlessly managed on Firebase, experience hassle-free payments through our Stripe-powered Payment page. Plus, navigate with confidence using Mapbox-integrated maps.

### Responsibilities:

- Applied state-uplifting for routing and data transfer.
- Used JSON data following 60-30-10 design rule for showcasing places.
- Built a hotel site with search, filter, and sorting using HTML5, CSS3, JavaScript, and React.
- Created Profile page and Contact us form with form data sending to firebase.
- Used Auth0 for Login authentication.
- Implemented Mapbox for Map integration.
- Deployed the project on Vercel.
- Managed the project using Git and GitHub.

## 2) MOVIES DETAILS WEBSITE.

**Role:** Front-End Developer | **Technologies:** ReactJs, Redux, JavaScript, HTML5 & CSS3.

**Description:** Welcome to our movie details website, your ultimate destination for all things cinema. Immerse yourself in a captivating carousel showcasing a diverse range of movies, from timeless classics to the latest blockbusters. Here you can discover a vast collection of films, while each movie's dedicated page provides in-depth information.

### Responsibilities:

- Build an IMDb-like app for movie exploration, watch list, and brief descriptions.
- Implemented Redux for state management.
- Developed website using ReactJs, Redux, JavaScript, HTML5 & CSS3.
- Developed interface using third party component carousel.
- Data fetched using Application Programming Interface.
- Created Cards as components.

## 3) E-COMMERCE WEBSITE.

**Role:** Software Developer | **Technologies:** ReactJs, JavaScript, Auth0, HTML5 & CSS3.

**Description:** This robust tech stack leverages the power of ReactJS to create dynamic and responsive user interfaces. Seamlessly integrated with Auth0, it ensures secure user authentication and authorization. The website's design and routing are expertly managed for an intuitive user experience. Notably, the implementation of 'Add to Cart' and 'Orders' functionalities enhances user engagement and provides a comprehensive e-commerce experience.

### Responsibilities:

- Managed website routing and design.
- Added 'Add to Cart' and 'Orders' functionalities.
